
HD Drone Detection & Tracking Camera From <http://www.jammerbooster.com/>

MODEL:	GD-H01
SIZE:	750*440*220mm
PACKAGE:	Neutral Packing

HD Drone Detection & Tracking Camera

Introductions

I The target attribute can be distinguished by identifying the probability level to distinguish non-UAV targets such as birds to reduce the false alarm rate.

I The camera automatically tracks the identified drone targets and performs real-time video forensics by the control system

Technical Specifications

Item **EO Camera** **1080p**
2 million
? 0.0021lux
