
High Power Stationary Anti Drone Jammer, Waterproof Drone Jamming System From <http://www.jammerbooster.com/>

MODEL:	KJ-200D9
SIZE:	590mm*420mm*260mm
PACKAGE:	Neutral packing

High Power Stationary Anti Drone Jammer, Waterproof Drone Jamming System

Model: KJ-200D9

Introductions:

The Jamming System is a Built-in Directional Antenna Waterproof Anti Drone Jamming System to block the commercial drones, uses state-of-art technology for maximum performance and reliability

Features:

Advanced jamming technology for high efficiency;

Frequency bands and output power selectable;

Integrated main equipment, backup battery, and antennas which increase mobility of the device;

Different frequency bands can be controlled independently by different switches;

AC or DC power supply can be selected;

Power Amplifiers protection design ensures the working reliability of the device;

Built-in backup battery can support the Jammer to work 1 hour (optional) .

Applications:

To block commercial used drones for any sensitive locations

Technical Specifications:

Total RF output power: 200W

Internal Modulation: FM Hopping Frequency and Sweeping

Signal Source: PLL Synthesized

Sweep rate: Fixed

Effective jamming range: more than 1km depending on the target signal strength;

Jamming target: commercial used drones/UAVs

Power supply: 220VAC/110VAC, 24VDC

Power Consumption: 600w

Continuous working hours: long time

Antennas type: External high gain directional antennas or omni antennas

Dimension: 590mm*420mm*260mm

Net Weight: 30kgs;

Operating Temp: -20°C - +50°C

Humidity: 5% - 95%
