
High Power 20-3000MHz DDS Vehicular Bomb Jammer From
<http://www.jammerbooster.com/>

MODEL:	KJ-700V11
SIZE:	625*510*700mm
PACKAGE:	Neutral packing

High Power 20-3000MHz DDS Vehicular Bomb Jammer

Model: KJ-1000V10

Introductions:

KJ-1000V10 is a vehicle mounted very high power jammer designed for blocking/jamming remote controlled improvised explosive devices (RCIED) Used by terrorist

KJ-1000V10 is using state-of-art technology for maximum performance and jamming the signals transmits to activate bombs

KJ-1000V10 controlled by microprocessor for programming and use unique internal modulation technique based on mixed signal for maximum jamming efficiency.

Jamming radius/range of the KJ-1000V10 depends on several conditions such as transmitter frequency and output power, distance to receiver, and obstacles between, etc

Features:

Maximum coverage range of 20 to 3000MHz

High efficient output power, long jamming radius

Continuous and simultaneous jamming with no gaps

DDS Jamming technology to make the Frequency range more precise

Slow start up design of circuit to make the device work stably.

Perfect Self Protection: Over Heat protection, Over current protection, High Voltage and low Voltage protection, VSWR protection

Easy operation, using Wire Control Panel or Windows software to monitor the system

Shock Absorber design to protect the device from damage because of high speed driving

Integrated backup battery can support the Jammer to work one hour

Applications:

Military Convoy protection

VIP Protection

RIOT Control

S.W.A.T Team

EOD Operations

Electronic countermeasure, etc
